CONGESTED DISTRICTS BOARD FOR IRELAND.

TO HIS EXCELLENCY JOHN CAMPBELL,
EARL OF ABERDEEN,

&c., &c., &c.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR EXCELLENCY,

We, the members of the Congested Districts Board for Ireland, beg leave to submit this Report of our proceedings during the financial year ended 31st March, 1906.

MONEYS FOR THE PURPOSES OF THE BOARD.

Our available funds in the past year amounted to £400,058, derived from the following sources:—

Income and
Expenditure.

(a) *Fixed Income.*

	£
Interest on Church Surplus Grant,	41,250
Parliamentary Grant,	25,000
Ireland Development Grant,	20,000
Total,	<u>£86,250</u>

(b) *Fluctuating.*

	£
Repayment of Loans,	10,921
Interest on Stock, &c.,	513
Rents and repayments under various heads,	101,210
Cash from Land Commission on re-sale of estates,	175,363*
Loans by Board of Works for improvement of estates and other purposes,	16,000
Total Receipts,	<u>£390,277</u>
Balance from last year,	9,781
Grand Total,	<u>£400,058</u>

* Note.—Subject to a payment of £143,399 for the purchase of Stock to be lodged at the Land Commission, see Appendix I.

The total expenditure as detailed in the Appendices to this Report was £375,065, which left a balance of £24,993 at the end of the year. A Table given at p. 57 shows, for each year since the formation of our Board, the gross receipts and expenditure, including all moneys which passed through our hands for the purchase of estates.

The net expenditure under the three heads specially provided for by the Treasury when the Parliamentary Grant was increased to £25,000 (see page 6 of our Report for 1899-1900) was for the past year:—

	£
Administration,	30,261
Technical Instruction,	8,966
Improvement of Estates (deducting borrowed money),	48,306
	<hr/>
	£87,533

Advances for
Purchase of
Estates.

The following advances were made in cash to the Land Judge by the Land Commission under Section 77 of the Irish Land Act, 1903, in payment for estates for which our offers had been accepted, between 1st April, 1905, and 31st March, 1906:—

	£
W. L. Rae,	4,350
M. J. Balfe,	5,500
J. W. Madden,	1,300
J. Tanffe,	2,387
Rutledge Fair,	4,000
J. Carey,	4,630
	<hr/>
	£22,167

The estate of J. Carey, included in this list, was vested in us before 31st March, 1906, but the advance of funds for payment was not made until April.

The advances which, during the past year, have been made under the 72nd Section of the Act of 1903, for the purchase of estates for which we had negotiated with the owners, outside the Land Judge's Court, are as follows:—

	£
St. J. R. Blake,	13,425
Dames Longworth,	24,762
Nugent,	7,181
Bingham, I.,	93,371
Bingham, II.,	9,000
J. E. Treston,	2,213
Margison,	4,412
Mitchell, II.,	5,190
D. M. Roche,	12,667
Hunter,	8,700
Fallon (Additional Advance)	642
C. W. Roberts,	1,961
	<hr/>
	£183,544

The amount of Guaranteed Land Stock issued to us under the Land Act of 1896, in the form of advances for the purchase of estates in the several counties, and for the redemption of charges

upon these estates, with the amounts since cancelled by the sale of holdings to the tenants, were on 31st March, last, as follows:—

COUNTY.	Total Advances.	Amount Cancelled at 31st March, 1906.	Amount Outstanding at 31st March, 1906.
	£ s. d.	£ s. d.	£ s. d.
Donegal,	19,873 9 3	—	19,873 9 3
Galway,	31,081 9 10	7,697 17 8	23,383 12 4
Mayo,	348,761 17 1	228,800 12 1	59,961 5 0
Down,	98,007 0 0	84,393 18 3	13,613 1 9
Sligo,	4,624 0 0	4,624 0 0	—
Total,	502,707 18 2	365,689 7 10	137,018 8 4

Stock to the value of £18,428 4s. 5d. was transferred to the Land Commission on 26th March in further reduction of our debt; but the amount was not "written off" in the books of the National Debt Commissioners until after the close of the financial year. We have lodged agreements at the Land Commission for sales to tenants, in addition to those included in the above statement, amounting to £120,379. The entire debt to the Land Commission for advances under the Act of 1896 will therefore be extinguished and there will be a balance due to the Board when these agreements have been finally passed.

OPERATIONS DURING THE YEAR 1905-1906.

Our operations fall under the following heads:—

- I. Improvement and enlargement of holdings and Migration;
- II. Sea Fisheries;
- III. Industries;
- IV. Engineering Works and Parish Committees;
- V. Miscellaneous.

[TABLE.

I.—IMPROVEMENT and ENLARGEMENT of HOLDINGS and MIGRATION.

Purchase of
Estates.

Since 17th October, 1905, the date of our last Report, we have arranged terms for the purchase of the following estates:—

Name of Estate.	County.	Area tenanted.	Area untenanted or let temporarily.	Purchase Price.
		acres.	acres.	£
A. J. D. Thomson,	Galway,	141	124	3,111
Edw. J. Keaveney,	"	377	247	4,280
H. P. Baker,	Sligo,	—	89	1,850
E. F. Phibbs,	"	1,442	437	8,000
D. B. Fair,	Mayo,	215	230	4,000
A. O'Donnell,	"	128	58	381
Mrs. Gibbon,	"	2,607	—	6,000
A. Jones (II.),	"	—	2,078	1,800
John Carey,	"	1,028	779	4,000
E. S. Dale,	"	78	249	4,500
W. Irwin,	"	63	1,180	800
E. O. Lynch,	"	2,371	—	9,354
P. C. Morris,	Roscommon,	—	354	6,500
Col. Glancy (Wills Grove),	"	—	282	5,847
Capt. C. French,	"	—	518	18,000
Michael Kelly,	"	—	172	4,600
Agnes J. Kelly,	"	94	164	900
J. Fitzgibbon,	"	—	48	1,200
Allanson Wynn,	Kerry,	13,426	504	22,000
Col. Longford,	Cork,	362	—	1,000
Totals,		30,107	5,417	110,631

These purchases make a total of 103 estates for £1,220,135, containing 263,175 acres, including 68,300 acres of untenanted land, bought under the Land Act of 1903.

Although this Report is a record of the business of the year ending 31st March last, we have followed our usual practice of enumerating the purchases of land made up to the date of our Report. The total amount of our purchases in the nine months which have elapsed since the 17th October last compares unfavourably with the total of £740,373 announced in our previous report, but the latter figure includes the purchases agreed upon in a period of about fifteen months. The purchases actually agreed upon in the year ending 31st March last amounted to £340,361.

In our last Report we stated that our purchases under Acts previous to that of 1903 were 171,356 acres for £469,016, but as under the later Act the purchase-moneys include the redemption of charges, the amount of our earlier purchases should, for the purpose of comparison, be increased from £469,016 to £557,110 by adding £88,094 expended by us, after purchase, on the redemption of charges.

While the total value of the 94 Estates purchased under the Act of 1903 up to 31st March last, was £1,172,070, the value of

12 estates which have been vested in us by the Estates Commissioners under Section 79 of the said Act at that date was £203,881 and the value of ten other estates vested by the Land Judge or purchased at auction is £82,471. Purchase of Estates.

A list of the estates purchased through the Estates Commissioners is given in the Appendix, with the dates on which the Originating Requests were lodged and the dates on which certain of them have been vested in us by the Commissioners up to 31st March last. The list shows that great delay has occurred in many cases, and it has been necessary to postpone all interference with the holdings in such cases, unless we took a risk which we were legally advised not to incur. Before an estate is vested we are unable to enter into contracts for the surrender or re-arrangement of the old holdings, or for parcelling out into enlargements or new holdings untenanted lands acquired by us.

Pending the settlement of the boundaries of the holdings, turbary rights, &c., preparatory to sale, the tenants are required to pay full rents, for the purchase price of each holding cannot be fixed before the boundaries of the new or enlarged holdings are determined, and terms of purchase finally agreed upon.

Having regard to the loss which must be incurred in effecting any radical improvement in the poor tenanted properties we purchase, our present funds, after providing for the loss to estates arranged to be purchased, would not in the future enable us to meet the loss that would be incidental to the preparation for sale of more than £140,000 worth of property in each year. The limitation of the Board's operations to the annual purchase of estates valued at no more than £140,000 would prolong indefinitely the relief of congestion, and in all probability effectually frustrate it. The Board would find in such a limitation a most injurious restriction on their usefulness.

On some of the estates we have purchased, there were good Migration. residences and demesnes which the Vendors did not wish to retain or repurchase, and which were not suitable for conversion into small holdings. We have endeavoured to utilise such houses and lands for the relief of congestion by exchanging them for farms situated in localities where land is more urgently required for enlarging small holdings.

The following is a list of such properties which were in our hands in the past year:—

Estate and District.	County.	Acrea.	Remarks.
Elliconey, Dummoro, .	Galway, . .	169	Disposed of by exchange.
Outfield, Aughrim, . .	" . .	825	—
Gallagh, Tuam, . . .	" . .	180	Disposed of by exchange.
Longford House, Ballinastoe,	" . .	387	—
Cooloe, Mountbellew, .	" . .	460	—
Ansefield, Hollymount, .	Mayo, . .	235	Disposed of by exchange.
Chaffpool, Axbury, . .	Sligo, . .	279	—
Brownhall, Balla, . . .	Mayo, . .	154	Disposed of by exchange.

Migration.

The Board have always been impressed with the fact that the lands in the Congested Districts which might be used for the relief of congestion were inadequate, and in the year 1902 the Commissioner of Valuation prepared for us a Return showing, approximately, the amount of land in all unions containing congested districts and in unions adjacent to these, held in tenements having a poor-law valuation of £25 and upwards, and on which the valuation of the buildings, if any, did not exceed £1. Our object was to ascertain the maximum quantity of land available for the relief of congestion, assuming that it could be obtained at a price not in excess of that which incoming tenant-purchasers would be able to repay by an annuity fixed under the Land Purchase Acts. The Return showed that, in the eight counties, the total amount of land on which there were no buildings, in tenements of £25 annual valuation and upwards, was 522,000 acres, while a further half million acres, on tenements having buildings valued at not more than £1, was presumably held in most cases by persons who did not reside upon these holdings.

As we desired to obtain more detailed information, the Commissioner of Valuation kindly gave our officers facilities, last year, for the preparation of statistics of lands comprised in tenements of £25 poor-law valuation and upwards, on which the valuation of the buildings did not exceed £1 in the Counties of Mayo and Roscommon. From this return, which is given in the Appendix of this Report, it appears that in the two counties there are 150,000 acres, excluding mountain land, comprised in holdings classed as above, and not in the occupation of resident tenants or owners. The quantity of grass-lands bought by the Board in those counties, up to the present, is about 33,000 acres. The non-residential grass-lands in the latter county afford a convenient means of effecting enlargement of the miserably small holdings in neighbouring Congested Districts by the migration of some of the tenants, or by permanently providing them with land for grazing their stock. A considerable portion of these non-residential grass farms is occupied by permanent tenants and tenant-purchasers, the remainder being under agistment lettings or stocked by the landlord, and as the grazing of these lands has not proved very remunerative for some years past, it may be hoped that owners will sell their interest at a fair price. However this may be we regard the purchase of these grass-lands in County Roscommon as a most urgent and pressing necessity.

The Return shows that the quantity of available land, contained in the non-residential holdings referred to, is extremely small in the congested districts, while it is very considerable in the adjoining non-congested districts. The figures are as follows:—

County Mayo.	Area.	Valuation.
In the Congested Electoral Divisions, excluding mountain land, .	7,217	£5,187
In the Non-Congested Districts, ex- cluding mountain land, .	48,320	30,688

County Roscommon.	Area.	Valuation.	Migration.
In the Congested Districts,	1,932	887	
In the Non-Congested Districts,	93,609	60,501	
<hr/>			
Total for both Counties, excluding land already bought by the Congested Districts Board,	151,078	£97,258	

The retrospect given on pages 9 to 11 of our last Annual Report of the successive legislative enactments passed during the previous thirteen years for extending our powers and adding to our funds, shows that it was only at the close of 1903 that we acquired the means we now possess for dealing with congestion, and we desire to call special attention to four most important matters in which our position still requires to be improved before we can successfully contend with the difficulties which have arisen in the discharge of our duties. These pressing requirements are:—

1. An increase of our income, to enable us to meet the loss in dealing with poor estates, and in carrying out migration.
2. Permission to borrow money from the Board of Works for the purchase of tenants' and tenant-purchasers' interests in large farms acquired for the purpose of re-arranging and enlarging holdings. The loan will be recovered from enhanced prices of holdings sold.
3. The removal by legislation of the difficulty in clearing title to the holdings vacated by tenants who are transferred to new holdings in the re-arrangement of estates.
4. The amendment of the 75th Section of the Irish Land Act, 1903, which limits the extent to which the Board may relieve congestion in the neighbourhood of an estate purchased by them outside the Congested Districts.

Next to the purchase of untenanted grass lands, the most important means of acquiring land for the enlargement of small holdings is the purchase by us of the occupation interests of large tenants on our estates. As their farms are usually in closer proximity to the congested portion of the estate, while untenanted grass lands are often at a considerable distance, the advantage gained is obvious. Since our operations commenced we had, at the 31st March last, expended no less than £34,338 on the purchase of tenants' interests in about 16,500 acres, comprised either in large farms or in the holdings of old and infirm men and women who were unable to work the land. We have also bought 1,934 acres for £23,210 from tenants who had purchased under the Land Acts. We have utilised the land contained in these holdings to relieve congestion, and there can be no doubt that one result has been to check the emigration of small landholders who, seeing no prospect of maintaining their families on

Purchase of
tenants'
interests.

their existing holdings, and being able to obtain high prices for their land, would be inclined to emigrate. We should add that we have no desire to cause the emigration of any tenant who is able and willing to work a holding, and we have instructed our Inspectors to offer a new holding to any tenant who expresses a desire to sell his interest to us, and is able and willing to take a better holding.

In addition to the £34,338 mentioned above, we propose in the present financial year to expend a further £38,000, in compensations to large tenants on our estates, many of whom were "future tenants" on whom we have served notices to quit, and who are entitled to compensation under a scale fixed by the 6th Section of the Land Act of 1881. On the Bingham estate we have thus acquired nearly 5,000 acres of arable land, and about 3,000 acres of mountain grazing.

No arrangements have yet been made for providing us with funds to meet the large outlay required for the purchase of the interests above referred to, and as we cannot hope to supply these funds from our own resources, we fear our operations will be very seriously restricted after the current year.

Title to
holdings
purchased.

The enlargement of holdings on congested estates entails the removal of many tenants from their original holdings and the redistribution of the vacated land amongst their neighbours, but in order to carry out these changes in a legally safe manner it is necessary to clear the title of the surrendered holdings, so that no claims upon them may arise after they have been sub-divided and re-sold. We have on several occasions in our former reports referred to the difficulty and in many cases the impossibility of freeing the holdings we have taken over from "equities" affecting title, and until some change in the law gives us greater facilities in this direction our operations must be seriously impeded.

Delay in re-
sale of estates.

Delays in re-selling estates to the tenants have arisen from various causes. In cases like the Vesey Stoney estate, we have had in view the purchase of untenanted arable land in the neighbourhood, with which we propose to enlarge the very small holdings. The four large grass farms on the Lucan estate, purchased at different dates in 1898, 1899, and 1900, were conveyed to us in October, 1904, and since that time we have been preparing new holdings, erecting buildings, fences, &c., and selecting suitable purchasers. These arrangements are now completed.

In connection with the disposal of untenanted lands we desire again to remark that our duty is not the very simple one of marking out the boundaries of new holdings on these grass lands, and of selling them to the highest bidder, or to suitable applicants coming from any part of Ireland. Our task is the very difficult one of seeking out occupiers of small holdings in the Congested Districts who are willing to migrate to these new holdings; to

negotiate for the surrender of their old holdings on terms acceptable to them; to see that a clear title to the occupation-interest can be given; to fully equip the new holding; to arrange terms of purchase with the migrant, and in many cases to assist him by loans to stock his land. Such transactions as these demand time and labour, and it is impossible to complete a large number of them, under every variety of circumstance, in a few weeks or months.

In many cases we have been unable to resell the estates because they were not vested in us, although under the arrangements we had made with the vendors, we had been able to take possession, collect the rents, and farm the untenanted lands.

A statement in the Appendix giving particulars of the new holdings to which tenants have been migrated, continues the information given in our last Report. The average cost of the establishment of each of these migrants is £87 exclusive of any portion of the expenditure which will be repaid to us by means of additions to the purchase-prices of the holdings. The nature of the improvement works done on such holdings, with details of the cost, was fully explained in our Report for the preceding year. We also give in the Appendix the number of holdings enlarged, exclusive of new holdings, on each estate which has been dealt with, and the quantity of untenanted land thus utilised.

Our expenditure in connection with the erection or improvement of dwelling-houses, and the erection of out-offices on all our estates, amounts to £76,719 up to the 31st March, 1906. Of this £28,200 represents our outlay in respect of the erection of houses and out-offices on re-arranged holdings and new buildings provided for migrants, and the remainder was given to the tenants in cash, or in value of materials from our stores.

Up to the 31st March, 1906, we had built 200 dwelling-houses and 184 out-offices, while under our various Estate Improvement Schemes, and the Parish Committee Schemes in operation throughout the congested districts, the landholders with some assistance from us, built and improved 1,372 dwelling-houses, and erected 1,266 out-offices.

During the past summer very satisfactory progress was made with the drainage of the River Lung, referred to at page 15 of our last Report, and the works were nearly completed in October, when further operations had to be suspended for the winter owing to the floods.

Full advantage had been taken of the exceptionally dry season, and from 500 to 700 labourers—all that were available in the district—were employed on these drainage works from June to October. Great benefit has been conferred on a large district, comprising portion of the Dillon, De Freyne, and several small estates drained by the Lung River, which follows a circuitous course for a distance of about twenty miles, and connects Lough Gara, in County Roscommon, with Urlaur Lake in Mayo. Its watershed includes an area of upwards of eighty square miles.

The expenditure up to 31st March, 1906, on the main river was £8,195. A further expenditure of about £800 will be required to complete it.

Of the cost to 31st March, 1906, £1,345 was expended in the erection of four new county road bridges at Lung, Roskealy, Cloonrow, and Carrowhehy, and the underpinning and repair of four county road bridges at Crennane, Feigh, Driney, and Cloontowart. The balance of the outlay, as well as a part of the cost of the bridges, was all paid to the unskilled labourers, tenants and sons of tenants, on the Dillon, De Freyne, Murphy, and adjoining estates. A large number of these persons reaped the double advantage of having received substantial earnings from the expenditure made in the execution of these works, which will substantially and permanently benefit their holdings.

The expenditure on 47 miles of the tributaries was in round figures £2,400.

The total area of land drained is 12,089 acres, including 6,762 acres of bog previously too wet to be utilised for turf.

The estimated fair rent of the land now drained is £2,800, and before the drainage works were commenced it was estimated at £1,695.

The difference between the two valuations represents a reproductive return of nearly ten per cent., on the outlay of £11,395.

The whole basin of the Lung River was heretofore a swamp, more or less flooded throughout the year. It is now efficiently drained, with the result that the resources of the landholders whose holdings are directly improved or rendered reclaimable are substantially increased, and there can be no doubt that benefit will extend far outside the previously flooded or water-logged area. The drainage of this river was generally admitted to be the most useful and reproductive work that could be undertaken in the large district lying between Ballaghaderreen, Loughglynn, Ballyhaunis, and Kilkelly.

In years past suggestions were made from time to time urging the landed proprietors of the district to have the necessary drainage works executed, but the cost was considered prohibitive. The estimates ranged from £20,000 to £30,000, and in order to secure the necessary fall the sinking of the river bed through rock around the townland of Lung for over a mile and a quarter was provided for.

After we purchased the Waldron Estate, comprising the townland of Lung, we decided to make a partial diversion of the river across the Waldron Estate, (see map in the Appendix), between points where there was a difference in level of 13 feet between the river bed at the intake of the new cut and the junction of its outlet with the main river, and thus avoid the necessity of deepening the rock bed of the river.

The new cut was made through boulder clay, and across it a stone bridge of three arches was constructed to carry the public road, the entire work costing a little over £2,000, which sum it was estimated was not one-fourth of the probable cost of securing the same outfall by sinking in the rock bed of the river.

As it was considered unnecessary to provide more than 8 feet of outfall in this new cut, the inhabitants of Ballaghaderreen applied to us through the Rural District Council of Castlearea for permission to utilise the remaining fall, with the waters passing through the cut for generating electric power to light the town of Ballaghaderreen, and, possibly, to provide electric power in connection with industrial projects.

We have agreed to lease a site for a Power Station near the outlet of our new cut on specified conditions at the nominal rent of 1s. a year.

We referred in our last Report to 301 small holdings in towns, Town
Tenants.
on the Dillon Estate, paying us ground rents. The following holdings, which have been sub-let by our tenants, are unsold, and will not be sold until it is seen whether the position of the sub-tenants is affected by the Bill now before Parliament:—

Ballaghaderreen,	33 holdings.
Charlestown,	17 do.
Ballyhaunis,	2 do.
Total,	52 holdings.

We have given directions that if, on any estate which has come Evicted
Tenants.
into our possession, there are unoccupied holdings, and if the tenants who had been evicted from them are living in the neighbourhood and are not only willing to resume occupation, but are able to work the land, they shall be reinstated and assisted to re-establish themselves in the same manner as other poor tenants on our estates who get new or enlarged holdings are assisted, viz.—by small grants for the erection or improvement of buildings, by advances for the same purposes repayable with the purchase annuity, and by loans for obtaining live stock. Or, in case we have any new holdings to dispose of after enlarging those of the small occupiers, any suitable tenants formerly evicted from estates now belonging to us, will be offered new holdings. It should, however, be noted that no special funds were given to us by the Land Act of 1903 for the assistance of evicted tenants, and we therefore have to refer many applicants whose former holdings are not unoccupied to the Estates Commissioners who have power to provide holdings and to draw upon the Reserve Fund for the cost of equipping them.

Acting on the above procedure, we have re-instated the evicted tenants on eleven holdings which were vacant on the De Freyne estate when we took possession, but until the purchase had been completed by the vesting of the estate, we could not make final arrangements in regard to those or any other holdings on the property. The estate was vested in us on 12th July, 1906.

Under similar circumstances we re-instated four evicted tenants on the Isidore Bourke estate, which was vested in us on the 20th February, 1902, and these holdings have been sold to the tenants.

The total number of applications for re-instatement made to us by persons who state that they or their predecessors had been evicted from estates which have been purchased by us, is seventy-six.

Live Stock Insurance.

As explained in several of our recent reports, we have to make arrangements in a large number of our estates to utilize the untenanted land in the interval after taking possession and before re-sale.

We have posters distributed in the neighbourhood of such estates and in adjacent congested districts with the object of getting the small farmers to send their cattle to graze on these lands, at reasonable rates, and if we cannot obtain sufficient stock in this way, we have to purchase cattle and re-sell them at the end of the season. Having every season a large number of cattle belonging to small landholders in charge of herds on our estates, we have felt that these poor stock owners should have some means of insurance against loss by disease or accident, for we do not consider it equitable that we should bear losses due to accidents for which our servants are not responsible. The loss of a beast will in most cases cripple a poor owner for several years, and we think the opportunity of training the people in the practice of insurance should not be neglected. To meet these objects we have now adopted as an experiment a system of live-stock insurance suggested by our Chief Land Inspector, and explained in Appendix No. XXV. It will be seen that the system is a mutual one between ourselves and the insurers, the fund to meet losses being provided, to the extent of about two-thirds, by a payment made by the owner of the cattle, while the balance if required is drawn from the grazing rent paid to us.

The loss is estimated at $1\frac{1}{2}$ per cent. for the six summer months during which time the stock will be under the control of our herds and thus the difficulties which prevent insurance companies undertaking this class of business are obviated.

II.—SEA FISHERIES.

The Sea Fisheries, on which we beg to submit a report for the past year, are those established or developed by us on the coasts of Galway, Mayo, and Donegal, and we now deal with them under the usual heads, viz :—

1.—SPRING MACKEREL FISHING.

The Spring Mackerel Fishery in the West of Ireland in 1905 was extremely poor, being one of the worst on record, owing, first, to unfavourable weather, and then to low prices caused by large supplies brought to the English markets from other coasts.

The general result was that few boats were able to do more than pay wages to the crews. Spring
Mackerel
Fishing.

The usual arrangements were made by us for the supply of ice at Cleggan, where the fish are packed on shore and despatched by land to the railway at Clifden. We also let an ice-hulk to the merchant who contracted with the fishermen at Roundstone.

At Aran the local conditions are entirely different from those at Cleggan and Roundstone. The fish cannot be packed on shore, as they must be forwarded at all times of tide by the steamer, which runs daily to Galway during the fishing season, while the pier cannot be approached at low water. If we provided a hulk with a supply of ice only one merchant could ice fish on board the hulk. It is therefore necessary for each buyer to provide a hulk with ice, and no one will do so unless he has secured a large supply of fish by contracting with the boats to sell exclusively to him. This arrangement is consequently the only suitable one at Aran.

The fishermen who worked their boats during the Spring of Aran Island. 1905 from Kilronan, contracted with Messrs. J. Smith & Sons, of Birmingham, on the following terms:—

April 3rd to April 15th,	. 25s. per 126 mackerel.
April 17th to April 22nd,	. 20s. " "
April 24th to April 29th,	. 15s. " "
May 1st to May 13th,	. 10s. " "
May 15th to May 31st,	. 8s. " "
June 1st to July 1st,	. 6s. " "

Thirty-six boats in all fished from Kilronan, and of those seventeen belonged to Aran, eighteen to South Connemara, and one to Dublin. The season was a poor one, the total amount taken by the fishermen at Aran being £2,369, or about £65 a boat.

Fishing began on the 18th April, and came to an end on the 20th June, the weather at the beginning and end of the season being very bad.

Twenty-three large and forty small boats fished at Cleggan, Cleggan. but owing to stormy weather very little fishing was done until May, by which time the prices were low in the open market maintained by the fourteen buyers at this station.

A glut in the English markets, caused by the large consignments received from steam drifters at Milford and in Cornwall, had depressed the price.

The season continued unfavourable throughout, alternating between storms and calms, with the result that the total takings of the fishermen amounted to only £2,020, or about £7 per man.

Some fish were sold early in June to a Norwegian trader, who came to Cleggan in a steamer with barrels, salt, and a staff of women as curers, to prepare and salt the fish on board. They could, however, only take a small quantity at one time, as they

Spring
Mackerel
Fishing.

had not sufficient curers. They, however, paid better prices to the fishermen than those current on their arrival. This system is a new departure in the curing trade in the west of Ireland.

Of the large boats fishing, thirteen were the Board's share boats, and ten were local boats from Cleggan, Clifden, and Inishboffin.

Dooloughan
and Bunowen.

Two large boats and twenty-one small boats fished at these stations, beginning on 21st April, and continuing till the 16th July, when the fishing closed. The fishing here was somewhat better than at the other stations in County Galway, and the total receipts of the fishermen were £480. The market was an open one, no contract being made with any merchant.

Roundstone.

At Roundstone the fishermen contracted with a firm, Messrs. Ruane, of Galway, for the purchase of their fish at the same prices as those fixed at Aran. Sixteen boats were at work, half being local boats, the rest coming from the Carna district, South Connemara. The fishing began on the 18th April, and the last boat ceased fishing on the 14th July, though most of the boats were laid up in the end of June. The coast at Roundstone being more sheltered from the winds which prevailed throughout the season than at other points on the Galway seaboard, may account for the longer season and the more satisfactory earnings, which were over £1,600, or about £100 per boat.

2.—AUTUMN MACKEREL FISHERY.

Cleggan and
Inishboffin.

The fishing at Cleggan began on 1st July, and continued till the 28th December, though not much was done after the middle of November. There were eighteen buyers present, and the prices varied from 13s. to 5s., the average prices during each month being as follows :

July,	8/9
August,	6/2
September,	9/8
October,	7/4
November,	8/-
December,	9/8

The fishing was most successful in July, September and October. The quality of the Autumn fish was particularly good both at Cleggan and Inishboffin, and the profits were better than in 1904, the earnings of the fishermen amounting to £1,800. This does not include mackerel sold by the islanders at Inishboffin and cured there. The fishing here, as well as at other places along the Galway coast, was confined to small boats, the fish being caught close to the shore at this season.

Aran.

At Kilronan, where herring nets were used for mackerel, the fish appear to have run small, from 400 to 420 being required for each barrel, and the price obtained was only 6s. per 126 fish, but this price was as good as that obtained for similar fish on the south coast of Ireland. At Kilmurvey, where Autumn

mackerel nets were used, the fish ran larger, and for a time 8s. was given per 126 until October, when the large takes brought down the price. Salt and barrels were sent by the Board to Kilronan, for sale to persons wishing to cure there. The fishing began on the 1st September, and closed on the 2nd December; but it was not pursued energetically in the early part of the season owing to the dispute with the buyers. There was, however, a fair fishing, and nearly £700 was earned by the fishermen, in addition to about £150 paid to others for curing, marketing, &c. Twenty large boats and twenty-five small were engaged. There was no Autumn mackerel fishing in the South Island of Aras, or at Clifden or Roundstone.

Autumn
Mackerel
Fishing.

A good fishing began at Tully on 1st September, and finished on November the 30th, the fish being of fine quality and sometimes running 300 to the barrel. There was, however, only one buyer and the prices were very low, partly owing to inability to cope with the curing of the fish landed, and partly to the large takes at Cleggan, Boffin, and other curing centres. The Board sent a supply of salt and barrels to Tully, for sale, in case the local buyers were unable to deal with all the fish landed. The fishing at Tully was carried on by fifty small boats and canoes, and the earnings of the fishermen amounted to over £200, not including the earnings of local people engaged in curing and marketing the fish.

The fishing at Doonloughan, Bunowen, and Turbot Island was good and the prices fairly high, three buyers attending at the two first named places. The earnings reached nearly £1,100, divisible among thirty-five small boats with crews averaging four hands. In addition the curing and marketing wages amounted to over £250. The Board's curing station and salt store at Doonloughan have been let to a local buyer for curing purposes.

Doonloughan,
Bunowen, and
Turbot Island.

Fishing at Darby's Point, Achill, commenced a little earlier, and ended about the same time as at Clare Island. It is a mixed fishing, both herring and mackerel being caught.

Darby's Point.

The fishing was a poor one at the very exposed North Mayo stations, owing to bad weather. At Munigreena and Bolderrig two buyers, and at Portacloy and Porturlin three attended. The fishing began on 1st August and was carried on, with some interruptions, till late in December. Altogether about £497 was earned by the fishermen and £140 by the hands employed in curing, all the mackerel being cured.

North Mayo
Stations,
Munigreena,
Portacloy,
Porturlin,
Bolderrig.

3.—SUMMER HERRING FISHERY.

The summer herring fishing began at Downing's Bay on the 8th May, and continued with much success till the 10th of June, the total earnings of our 35 decked boats being £3,200. A large fleet of 115 Scotch boats also attended, but left for the Shetland fishing at the end of May. The fishing during the early part of the season and, in fact nearly all through, was rather light; but

Downing's
Bay.

Summer
Herring
Fishing.

some boats got heavy catches late in May, £1,400 being realised in one week and one boat making about £200 in one night. The important feature of the summer fishing was the excellent quality of the herrings landed, and the lightness of the catch was compensated by the good prices, 60s. to 90s. a cran being paid during most of the season.

In both the German and Russian markets Downing's Bay cured herrings took the leading position, and at Stettin and Hamburg they sold all through at from 10 to 15 marks per barrel above the famous Castlebay herrings. Only one cargo of Downing's Bay herrings was sent to St. Petersburg, where they fetched from £1 to £2 per barrel above the best Castlebay fish, realising from 70 to 80 roubles per barrel.

Teelin.

Seven of the Board's boats fished at Teelin from the 18th May till the 10th June, but the fishing was light, and the earnings only amounted in all to £95.

Tory Island.

The summer fishing at Tory Island was practically a blank, with the exception of one heavy take in May, when the islanders realised £400 in one night for 200 crans of herrings.

Clare Island.

The Clare Island curing station was the only one opened by ourselves last season, there being no other buyer on the island. Nine small boats fished, and earned about £50 between 17th August and 1st November.

4.—AUTUMN HERRING FISHERY.

Downing's
Bay.

Fishing was begun at Downing's Bay by small boats on the 3rd August, but owing to unsettled weather our fleet of large boats did not commence until the 23rd, when several of the curing stations were opened. The fishing continued light, with unfavourable weather, until the 20th September, when it improved considerably, and heavy fishing then continued until the end of November. On the 16th December the boats were laid up. The fishing was the best on record for the Board's boats, which made nearly £7,000 at Downing's Bay alone, while our boats on other portions of the coast of Co. Donegal made over £3,000.

The fish during the whole season were of good quality, and the prices were satisfactory. The fish at this season are generally caught in Sheephaven or close to the shore, but in October heavy fishing was got to the west of Horn Head, the Board's boats landing 800 crans on the 21st. As a result of the success of both the summer and autumn fishing in Donegal four of our boats worked on the "share system" are now fully paid for, and have become the property of the crews, while a large number of others have made good progress in repaying their cost, as may be seen from the account given in the Appendix. A large number of applications from new crews for boats under the share system have been received, and we arranged for the purchase of seven additional decked boats. All new boats ordered are thirty-six feet on the keel; and the usual practice is to transfer crews having some

years' experience into these larger boats, and to place new ^{Autumn} inexperienced crews on the smaller boats vacated by the older ^{Herring} crews. This system of promoting good crews has an excellent ^{Fishing.} effect.

The fishing at Rosbeg and Loughros began on the 12th ^{Rosbeg and} November and finished on the 18th January, 1906. About ^{Loughros.} sixty small boats took part in the fishing, the boats from the Rosses district, which usually attend this fishing, being engaged this season at Burton Port. The fishing was good, the total earnings of the fishermen being over £800, while the people employed on shore in connection with the fishery earned about £200, including cartage, curing, &c., &c.

The fishing at Kincasslagh and Gortnasate begins consider- ^{Kincasslagh.} ably later than at Downing's Bay and did not open until the 12th October, but it was very heavy, especially during the early part of the season, and ended on 15th December. Eighteen of the Board's boats fished at this station, and, including some which began the season at Downing's and subsequently went westward, the earnings in all amounted to over £3,200 for 18 boats. In addition to our own boats there were 120 small boats fishing at these ports and their total takings are estimated at £5,000. About 100 people at Kincasslagh are employed in curing, "freshing," and kippering, and their earnings amounted during the season to over £400.

The herring fishing at Burton Port was very successful, the earn- ^{Burton Port.} ings of the fishermen being the largest on record. About 14,500 barrels were cured, 5,000 crans were sold fresh, and over 14,000 boxes were kippered. The total earnings, including those of the fishermen, curers, carters, &c., probably exceeded £20,000, of which about £18,000 was received by the fishermen. In spite of the heavy fishing the prices remained good, seldom dropping below 20s. per cran.

For the first time a good herring fishing was got in the ^{Magheraarty} Magheraarty district during the autumn by yawls and small ^{and Palsarragh.} boats, including all the Tory Island yawls, using ring and drift nets. About 300 to 400 crans were sent away fresh and 2,000 barrels cured. The fish were large and of similar quality to Downing's Bay herrings, but owing to the buyers not being prepared for such good fishing prices were low, averaging from 12s. to 14s. per cran. Considering the circumstances, and that this was the first fishing it must be considered fairly satisfactory. The weather was fine during the season, otherwise the small Maheroarty boats could not have fished.

Nearly £750 were taken at Magheragallon and Bunbeg during ^{Magheragallon} the autumn fishing which began and ended about the same dates ^{and Bunbeg.} as at Kincasslagh.

Four of the Board's boats with temporary crews went to ^{Darby's Point} Darby's Point from Clifden for the Autumn herring fishing which ^{(Achill).} began early in August and continued till the 1st November. In addition to our boats there were two other large boats engaged in

Autumn
Herring
Fishing.

the herring fishing as well as a fleet of small boats and canoes. All the fish were sold fresh, over 1,300 boxes being marketed. The earnings amounted to a little over £400 taken by the fishermen, and £150 by the workers on shore.

The Board's four large boats fished under contract with a local buyer at the fixed price of 4s. per 126 herrings.

South
Donegal.

Early in Autumn herrings appeared in Inver Bay and off St. John's Point, and good fishing was got for a few nights, after which they left the Bay and did not return for some weeks. The herrings were of good quality and large size. The take during the season was from 400 to 500 crans. No doubt a better fishing would have been obtained if the boats had begun earlier, and it is probable that with more watchfulness on the part of the fishermen, a good fishing might be got in the early Autumn.

5.—LONG LINE FISHING.

Teelin.

Nine of the Board's boats fished at Teelin from the 3rd February till the end of March, but with poor success, the total earnings of these boats amounting to less than £40.

North Mayo
Stations.

The fishing at Porturlin, Portasloy, Belderrig, Rinroe, and Muingerreena was extremely poor, and few boats were fishing.

Aran Islands,
Co. Galway.

The fishing was poor and mainly confined to the South Island, where it was carried on almost entirely by curraghs. The South Aran fishermen contracted with a buyer to sell white fish at fixed rates during the season as follows:—

Cod, 6s. per dozen of 13.
Haddock, 4s. per dozen of 13.
Turbot, 5d. per lb.
Halibut, 3d. per lb.
Ray, 6d. per stone.
Conger, 1s. per stone (black and white).
Hake, 1s. each.
Herring, 2s. 6d. to 3s. per hundred.

These were the prices paid during the previous season. Five of the South Aran crews commenced fishing in their Green-castle yawls, but on the 8th February four of these boats sank at their moorings during a gale, one of them being totally lost, and a good deal of the gear of the others was not recovered. After this the crews asked to be allowed to fish in curraghs, and used them the rest of the season. The fishing began in the middle of January and ended in the middle of April, and was frequently interrupted by bad weather. Twenty-three boats and curraghs took part in the fishing and earned £309. In addition to this, about £45 was earned by the people engaged in marketing the fish.

6.—CURED FISH TRADE.

The sale of both mackerel and herrings in the American markets improved in the Spring of 1905. The price of cured mackerel, although low in the winter, subsequently recovered, partly owing to the poorer fishing on the American coast.

7.—INSTRUCTION IN FISHING.

No change has been made during the past year in the terms ^{Instruction} on which instruction has been given in fishing. ^{in Fishing.} Instructors are supplied as heretofore to untrained and inexperienced crews, and as soon as the men are capable of fishing by themselves the Instructor is withdrawn, and the one-ninth of the earnings previously reserved by the Board for the payment of the Instructor is carried to the credit of the Sinking Fund to pay for the cost of the boat. In Donegal thirty-eight Instructors were employed during the Summer herring fishing for a period of about five weeks, and in the Autumn forty-two Instructors were engaged for fourteen weeks. In the west and south of Mayo and Galway twenty-seven Instructors were required for the share and loan boats during ten weeks in the Spring mackerel season, and sixteen Instructors during the Autumn mackerel and herring fishing for sixteen weeks. The Instructors in the Donegal boats are all Scotch, while the western boats are under the charge of Arklow and Cork men, except in a few cases, where experienced local fishermen were employed.

For untrained South Connemara crews we provided two Instruction boats which fished at the Aran Islands. The crews of these boats being quite new to the work required special instruction and two instructors were allotted to each boat. These crews did not, however, turn out very satisfactory, as some of the men frequently absented themselves, and in the case of one of the boats three different crews in succession were selected during the season. Unless crews can in future be got together who will be prepared to work steadily through the fishing season, it will be useless to continue this special scheme of instruction for South Connemara fishermen.

The total cost of the instruction provided last year for 67 share-boats and 5 loan-boats was £3,500, of which £1,253 was repaid out of the earnings of the boats under the terms we have laid down, leaving a net cost of only £2,247, a large reduction on the net cost in preceding years.

8.—BOAT BUILDING.

Nine large boats were added to the Board's fishing fleets in 1905. Seven of these were Zulu boats for the Donegal fishing, ^{Boat build- ing.} and two were nobbies.

A return called for by Sir Thomas Esmonde in the House of Commons has been printed in the Appendix. It gives particulars of all the large decked boats which we have had built or have purchased since our operations commenced. As various systems of measuring fishing boats for tonnage appear to be in use, the length, breadth, and depth of each boat have been given.

We decided to discontinue the employment of a shipwright at our boat yard at Kilronan, Aran Islands, and have lent the yard to three men, who had been trained there, as a building and repairing yard, giving them the services of an apprentice free of

charge. We also gave them a contract for a Zulu boat, to start them in their new undertaking, although the cost of the boat will be considerably more than that of similar boats purchased in Scotland, owing chiefly to the cost of materials.

9.—SHARE AND LOAN BOATS.

Fishing
Fleet.

Including the seven new Zulus added to the Board's fleet last year, the number of large decked boats employed on the share system in the Herring Fishing in Co. Donegal was 63.

There were also 13 nobbies at the beginning of 1905 worked on the share system on the coasts of the Counties of Galway and Mayo, and two were added to this fleet during the year. Five boats were sold to fishermen who obtained loans from us, and four others were applied for, leaving only six share-boats on our hands in those two Counties, including the two special Instruction boats for South Connemara.

The Board had thus 69 boats in all for share and Instruction purposes at the beginning of the present season.

In June last four Achill crews abandoned their boats, and in August we advertised for sale eleven large boats, including these four hitherto worked on the share system. Only two now remain unsold.

The capital of Fishery Loans transferred to us by the Board of works in 1893 amounted to £36,685, including all instalments of interest and principal then unpaid, but excluding the £50,000 which we applied to other purposes in 1893 and the following years. Of the total of £36,685 we have since collected £31,073 and have written off as irrecoverable £4,710, leaving a balance of £902 to be collected. The loans made by us since 1893 amounted to £80,350. (See Appendix XI.)

Since our work commenced, in 1892, ninety-two loans for large boats, including some cases transferred to us in 1893 from the Commissioners of Public Works, have been paid off by the owners.

Loans amounting to £7,385 were made in the year for fishing boats and gear, and eleven large boats purchased by this means brought up the total number of loan boats to 115. The entire fleet of large fishing boats now on the Board's books, including both loan and share-boats, numbers 188, only one of them being owned outside the Congested Districts.

Repayment of
Loans.

We mentioned in our last Report the unsatisfactory state of some of the loan accounts for large boats in South Connemara. We have had, during the past two years, to foreclose the mortgages and take possession of nine boats, on which a total of £1,386 was in arrear, out of £3,119 originally lent. In fifteen other cases, not so seriously in arrear, we have had to appoint collectors to receive the boats' earnings and distribute them, after lodging a portion to our credit. The tabular statement given in the Appendix (No. XV.) shows that the spring mackerel fishery has for several years been declining in value, a variation to which all fisheries are liable at recurring periods.

Another circumstance, militating against the energetic prosecution of the fisheries in South Connemara, is the turf trade carried on for many generations for the supply of turf to Galway, Aran, and other places in proximity to Galway Bay. The industry of cutting, drying, and carrying turf gives more certain and more agreeable employment to the owners of hookers than a fishery which has to be followed at night, often in stormy weather, and may cease altogether during certain seasons of the year.

10.—BARREL-MAKING.

The steamer "Granuaile" brought three cargoes of staves, headings, and iron hoops from Scotland for our cooperages at Downings Bay and Burton Port, and for sale to coopers in Galway, Cork and Kerry. A new store has been erected at Burton Port, as the accommodation for barrels there was quite insufficient. The total number of barrels made during the year was 10,350, and the number sold was 12,193. The gross expenditure on our cooperages from the commencement of our operations up to 31st March last was £16,727 6s. 7d., and the receipts £18,035 10s. 1d., taking no account of stock in hands or of the value of the buildings and plant.

11.—FISHERY LIGHTS.

The fishery lights which we have erected, and which are now in use, are the following:—

Cleggan Head, Co. Galway,	} 30-day Wigham lights.
Leighon Head, "	
Deer Island, "	a 90-day lamp.
Kilronan, Co. Galway,	an acetylene "leading light"
Cleggan Pier, "	a small lamp.
Brandon Pier, Co. Kerry,	a 7-day Wigham lamp.
Wyon Head, Co. Donegal,	a 30-day lamp.
Portnablagh, "	a 7-day lamp.
Derrynane, Co. Kerry,	a pair of "leading lights" are in course of erection.

III.—INDUSTRIES.

LACE AND CROCHET.

The principal demand in the past year has been for Crochet of ^{Lace and Crochet} good design and buyers appeared to prefer the finer qualities. All the classes engaged on crochet have been kept fully employed and good prices were realised for the best quality of work.

Although Limerick, appliqué, and guipure Lace do not command so large a market as Irish crochet, they have been in fair demand and the increasing disposition to purchase Guipure Lace

referred to in last year's report, has been maintained during the year.

The total receipts of the Board's classes during the year exceeded previous records, the earnings of workers, exclusive of sales made to local buyers, being £21,573, notwithstanding that the turnover of many classes has been unsatisfactory, owing to irregular attendance and the want of steady industrial habits.

Experience indicates that these industries might be of much greater value in many poor districts were there a general disposition on the part of the workers to make lace a self-supporting industry and to give the same time and to put the same energy into it as they would be required to do if working daily in a factory.

The value of these classes in such districts is illustrated by the fact that the money earned last year by the girls in eight of the lace and crochet classes held in seven Electoral Divisions of North West Mayo considerably exceeded the total poor-law valuation of the land in those Divisions, and as that valuation generally exceeds the rents payable by the tenant-farmers this addition to their incomes must have been a very appreciable benefit.

Were all the Irish Lace-producing centres to adopt some recognised registered trade mark, and were this applied in some simple way to every specimen of Irish lace produced, the purchaser would have a guarantee that the article is genuine, and the growing practice of selling continental machine-made lace as Irish would be checked. Some such arrangement is essential to protect the industry as well as the purchasers, who are to a great extent unaware of the large quantity of continental machine-made lace and crochet which is being sold in this country.

The backward spring and a momentary check in trade has recently caused a falling off in the demand for Connemara curtains. It is hoped, however, that this is merely temporary, and efforts are being made to keep the workers fully employed.

As these home-industry classes must, at some future date, when our assistance is necessarily withdrawn, become entirely self-supporting, we propose to gradually introduce the system of requiring a contribution towards the salary of the teacher, in the form of a small percentage on the sales.

DRAWING.

Instruction in drawing has been given at several classes on one day in the week, and in several cases pupils who showed a special aptitude for designing were sent for a course of instruction to the Metropolitan School of Art at Dublin and Cork.

HOMESPUNS.

The demand for homespuns has been on the same scale as last year, 2,532 webs were measured at the Board's Depots at Ardara and Carrick, County Donegal, of which 2,358 pieces were

sold. The increasing tendency to use machine-spun warp is much to be regretted, as it spoils the homespun character of the goods and threatens if continued to do this industry much harm. Homespun.

Instruction in weaving has been given at Kindrum and Kerrykeel (County Donegal), Clonbur (County Galway), and Glenbeigh (County Kerry).

MACHINE KNITTING.

The introduction of machine knitting in County Donegal is gradually replacing hand knitting, and appears well suited to the people as a home industry. With the aid of knitting machines the workers are earning 1s. 6d. to 1s. 8d. per day as compared with tenpence per dozen pairs of hand-knit socks, the rate of earnings to which they had been reduced by the competition of machine-made goods.

Classes for instruction under teachers supplied by the Board have been held at Middletown, Breenagh, Glen, Bunbeg, and Glenties (County Donegal). The Donegal hosiery merchants have had more orders for the past season than they were able to fill, and those who purchased knitting machines have been kept well employed at a very fair rate of remuneration.

DOMESTIC TRAINING CLASSES.

The Board's Teachers have given instruction in Domestic Economy, Cookery and Laundry, at Killybegs, Bruckless, Dungle, Lettermacaward, Mountcharles, Downstrands, Termon and Kilear (Co. Donegal), Carna, Cashel, Roundstone, and Kilroman (Co. Galway), Eyries, Ardgroom, Goleen and Ballydehob (Co. Cork), and Knock (Co. Mayo). Ten pupils from Congested Districts in Co. Kerry were given a course of instruction at the Killarney School of Domestic Economy, the cost being defrayed by the Board.

CARPENTRY CLASSES.

Carpentry Classes under the Scheme indicated in previous reports have been held at Rossinver (County Leitrim), Aughamore and Kiltimagh (County Mayo), Kilmactigue (County Sligo), Clonbur and Cashol (County Galway), Glencar (County Kerry), and Glengarriffe, and Ballydehob (County Cork).

DONEGAL CARPETS.

The four factories in County Donegal, the first of which was opened in 1898, continue to give employment to a large number of workers.

INDUSTRIAL LOANS.

Loans on approved security for the purchase of spinning wheels, improved looms, knitting machines and carpentry tools, for pupils at the Board's Manual Instruction Classes, have been made to a considerable number of applicants, 290 loans having been made, for sums amounting to £880, during the past five years. Loans.

LIST OF INDUSTRIAL CLASSES.

Lace, &c.
Classes.

Lace Classes at Glencolumbkille (County Donegal), Gurteen and Banada (County Sligo), Ardnaree and Kiltimugh (County Mayo), Oughterard and Dunmore (County Galway), Ballingeary and Glengarriffe (County Cork), Cahirciveen and Shanaculan (County Kerry).

Crochet Classes at Ardara, Creeve, Massinass, Dungloe, Fintown and Carrigart (County Donegal), Cliffoney and Magherow (County Sligo), Kiltyclogher (County Leitrim), Bangor, Attymass, Carratigue, Corclough, Derreenadaffderg, Derrypark, Doohoma, Foxpoint, Glenamoy, Pallathomas, Belmullet, and Ballycrov (County Mayo), Rossmuck, Costelloe, Carna, Spiddal, Roscahill and Clonbur (County Galway), and Kilerohane (County Cork).

Embroidery and Drawn Work Classes at Ardara (County Donegal), Derrew, Partry, and Shrah (County Mayo).

Lace Curtain Classes at Carraroe, Lettermore, Lettermullen, Kilkerrin, and Clifden (County Galway).

NEW CLASSES.

In addition to the above the following new Classes have been opened, some of which are only a few months in existence, viz. :—
Crochet Classes at Bruckless (County Donegal), Killarga (County Leitrim), Porturlin, Tourmakeady and Shrah (County Mayo), Killeany, Leenane, and Roundstone (County Galway), and Durrus and Castletownberehaven (County Cork).

Embroidery Class at Gartan (County Donegal).

IV.—ENGINEERING WORKS AND PARISH COMMITTEES.

The net expenditure on Works during the past year amounted to £7,586, divided as follows :—

Marine Works, Piers, Slips, &c.,	£ 4,028
Roads, Bridges, Drainage Works, &c., carried out by the Board,	270
Roads, Bridges, &c., carried out by County Authorities, aided by contributions from the Board amounting to	2,388
Total,	£7,586

The payments for marine works include the sum of £2,650 forming our contributions towards the cost of piers, &c., erected under the Marine Works Act of 1902.

The details of the above expenditure will be found in Appendix No. XXI.

Kinvarra
Quay.

The small harbour of Kinvarra, on the southern shore of Galway Bay, is not within the districts scheduled under the Act of 1891, but, as a considerable quantity of turf is carried to Kin-

varra every year from the congested district of South Connemara, Piers and Roads.
 the improvement of the landing accommodation sufficiently concerned the districts in our charge to justify us in offering a contribution of £200 towards the cost of the improvements. The Government made a grant of £1,100 under the Marine Works Act, 1902, the County Council of Galway voted £800, and the Department of Agriculture £1,100.

The works are being carried out in two stages, the first by the Board of Works, with £1,100 provided under the Marine Works Act, and £800 from the County funds; the second stage of the work will, if certain legal difficulties can be surmounted, be under the control of the County Council, who will contribute £300, the Department of Agriculture £1,100, and our Board £200.

In order that no legal difficulty should be created by the expenditure of public funds on a harbour which was private property, we consented, at the request of the Irish Government, to take over the harbour from the Trustees of the Sharpe Estate and hold it until it could be vested in the County Council, after the expenditure of the Marine Works Act Grant, but we are not responsible for the execution of the work.

In the Mahanagh Electoral Division, Rural District of Manorhamilton, there has been great need of roads to enable the people to reach turf bogs and to provide better access to Greaghmaghlogh National School, which is four miles from a county road. It is stated that 100 families have had to buy coal owing to the want of a road to the bog. Two sections of the proposed new roads have been undertaken by the District Council, the first from Greaghmaghlogh to Cooicormick and the second from the latter townland to Derrintawy, and we have agreed to contribute half the cost of three roads up to a maximum grant of £750. Mahanagh Roads.

In the Electoral Divisions of Culdaff and Carthage, Inishowen, a considerable extent of land was annually flooded by the River Ballyboe, and as the proposed deepening of the channel extended to the sea, no claims could arise from owners or occupiers of lands situated below the works. As a local committee undertook to obtain all necessary consents and carry out the improvements, we gave them a grant of £400. Culdaff Drainage.

The Dingle Harbour Commissioners having decided to dredge portion of the harbour, at a cost of about £900, hiring the steam-dredger belonging to the Board of Works for the purpose, we have agreed to contribute £400 towards this expenditure. Dredging of Dingle Harbour.

In connection with the application for the provision of a ferry service across Lough Corrib, surveys have been made to ascertain the possibility of working a chain ferry. The only place at which such a ferry is regarded as practicable, viz., between Knock and Kilbeg, is however, of such width as to render it improbable that, with the local conditions, a ferry could be satisfactorily worked. A preliminary survey was subsequently made to ascertain the possibility of constructing a causeway to reduce the width, but the estimated cost of the causeway was considered to be Lough Corrib Ferry.

prohibitive. A further examination will, however, be made during the summer, at low level of the lake.

Lough Corrib
Navigation.

During the past year the Department of Agriculture have subsidised a steamer on Lough Corrib to serve districts not heretofore benefited by the service. The Board have joined with the Department in building two piers for this service, viz., at Coolpark (serving the Clonbur district), and at Maam (serving the extensive Maam valley). A small pier has also been built at Cornamona, at which the steamer calls. It is reported however, that it does not meet the requirements of the place, and the question of enlarging it is under consideration.

PARISH COMMITTEES.

Parish
Committees

The Parish Committee Scheme, for the encouragement of small landholders in improving their dwellings and farms, was commenced in 1897 by grants, amounting in all to £1,520, to twelve parishes in the most densely populated portion of the Congested Districts, viz., East Mayo. The objects of the scheme were so well attained that we have gradually extended its operations to ninety-five parishes in Connaught, thirty-four in County Donegal, and twenty-four in Cork and Kerry, as shown by the list of parishes in Appendix No. XXIII. The amounts voted in the past year were £7,275 for Connaught, £2,065 for Donegal, and £2,045 for Cork and Kerry. No applicant whose land and buildings exceed the Poor Law Valuation of £7 is eligible for a grant from these Committees.

Under the conditions of the scheme the value of the work done by the landholders to whom the small grants, generally from £1 to £3, are made, is greatly in excess of the payments made by us. Excluding County Donegal, the works done last year were valued at £30,374, while as stated above, our grants were only £6,909. The nature of the works carried out was as follows:—

- (a.) Erection of new dwelling-houses, or the improvement of existing dwellings. 200 new dwelling-houses were erected, the estimated cost being £4,327 in respect of which grants to the extent of £546 were made. Improvements were made in 1,172 existing dwelling-houses at an estimated cost of £8,080, towards which grants to the extent of £2,072 were made.
- (b.) In 1,266 cases the erection of new out-offices was undertaken, the estimated value of the works being £11,877, and the grants sanctioned were £2,764; whilst in 365 cases improvements were made in existing buildings at an estimated cost of £2,491, for which grants amounting to £610 were sanctioned. It is the primary duty of the Parish Committees to cause the cattle to be removed from the dwellings of the people, and although considerable progress has been made in this direction much remains to be done.

- (c.) Drainage and Fencing.—156 works, estimated to cost £1,249, in respect of which grants amounting to £219 were sanctioned. Parish Committees.
- (d.) 177 works, comprising the making of new and the repair of existing roads, were approved, the grants in the aggregate amounting to £312, and work to the estimated value of £1,846 was undertaken.
- (e.) Reclamation of waste land and other unclassified works, to the number of 62, were undertaken, the grants amounting to £86, and the value of the work to £504.

The additional parishes included in the scheme last year were in the counties of Cork (2), Kerry (3), Leitrim (3), Galway (3), Mayo (4), and the manner in which the business was conducted in the new parishes is encouraging, for it leads us to believe that the scheme will be carried out in a thorough manner when it is fully understood. In eleven of the 119 parishes in Connaught and Munster no committees were formed in time to carry out works last year, and in five parishes the grants were withdrawn.

In regard to Co. Donegal the figures for each class of work are as shown in Tabular Statement beneath:—

Nature of Works.	Number.	Estimated Cost.			Grants sanctioned or Prizes Awarded.		
		£	s.	d.	£	s.	d.
New Dwellings, . . .	67	2,700	9	0	122	9	1
Improvements to Dwellings,	711	4,817	7	10	782	6	4
New Out-offices, . . .	466	4,700	3	0	673	7	13
Improvements to Out-offices,	67	493	14	8	70	15	8
Drains and Fences, . .	288	1,518	8	11	187	17	11½
Roads,	72	381	10	6	69	5	7
Miscellaneous, . . .	148	554	1	6	91	13	9½
Total,	1,714	15,118	15	5	1,897	14	4

Very satisfactory work has been done in most of the parishes under the Donegal Scheme. The value of the work in several of the parishes represents from ten to fourteen times the amount of the grant, and in the case of one parish work to the estimated value of twenty-two times the amount of the grant was carried out.

V.—MISCELLANEOUS MATTERS.

Since the date of our last Report no additions have been made to the list of Raiffeisen Credit Banks established in the Congested Districts. The number carrying on business on 31st March, 1906, was 67, but it has been decided to close six of these, viz., the Began, Logboy, Kilmore-Errie, Lettermore, Sneem, and Glenbeigh Banks.

Raiffeisen
banks.

Raiffeisen Banks.

In the case of four of these banks the reason given for closing was that sufficient interest was not taken or that a clear apprehension of the principles of the scheme was not shown by the managers. In the other two cases the members of the local committees were unable to work harmoniously, and the efforts made to settle their differences were unsuccessful.

The general results of the operations of the banks are indicated by the detailed statements in Appendix No. XXII. These show that a large number of small loans have been issued, and that although the banks build up little reserve for their own balance-sheets their business is carefully managed and their capital fully employed. But, on the whole, it cannot be said that these banks have emerged from the experimental stage.

Migratory Labourers.

As a matter affecting the well-being of a very large section of the population of the Scheduled Districts, we desire to refer to the very interesting report issued in the present year by the Department of Agriculture and Technical Instruction, on the migration of labourers from the West of Ireland to various parts of Scotland and England. An account is given of the wages earned in the different localities in which the migrants usually obtain employment in Great Britain.

Kelp burning.

The portions of the coast of the Congested Districts in which kelp-burning is an industry of considerable value, adding appreciably to the means of subsistence, are the coasts of Mayo and Galway, with the islands from Aran to Inishkea, and the north and west shores of Co. Donegal, with the islands of Tory, Inishboffin, Gola, &c.

The prices obtained last season for burnt kelp were from £3 10s. to £4 10s. per ton, and for the dried unburnt weed of selected kinds £1 10s. per ton. As many families sold from two to four tons of the burnt kelp, their receipts may be estimated at £10 or £12 for each family.

The extent of the industry is shown by the fact that the estimated receipts on the north coast of Donegal last year were £1,180, and on the west of Galway 177 families made about £2,400.

It appears, however, that the quantity of kelp burnt is less than it was ten years ago, less labour being devoted to this industry.

Local Agricultural Shows.

In the Appendix will be found a list of the Local Agricultural Societies, to which we made grants to assist in providing prizes at annual Shows.

Subsidies to Steamer Services.

The only subsidy paid last year was the annual grant of £700 a year to the Galway Steamboat Company for the Aran Island service, but we entered into an agreement with the Bantry Bay Steamship Company to pay them £200 a year for five years for an improved service in Bantry Bay, including regular calls at the new piers at Adrigole and Glengarriffe, now in course of construction by means of a grant of £1,900 from our Board and an equal sum from the Department of Agriculture.

At the request of the Committee of Lady Dudley's Nursing Fund, we have agreed to build cottages for nurses at Anagry, Co. Donegal, Dooks and Caherdaniel, Co. Kerry, and Bealadangan, Co. Galway, in addition to the three places mentioned in our last Report, and the Committee have undertaken to pay interest upon our outlay. Lady Dudley's
Nursing Fund.

In 1894 we opened small coffee-stalls for the benefit of the fishermen at Teelin and Malinbeg, and in subsequent years we opened similar stalls at Downing's Bay, Kincasslagh, Magheragallon, Cladnageragh, Rosbeg, Burtonport, and Gortnasate, all in Co. Donegal, and at Cleggan, Kilronan, Kilmurvey, South Aran, and Roundstone, Co. Galway. During the fishing seasons at each place we pay a woman six shillings a week to take charge and provide refreshments, with the stipulation that coffee shall be sold at one penny per cup. At Roundstone the Co. Galway Temperance Association have undertaken the management and maintenance of the building which we erected. Coffee Stalls.

We have been, as in many previous years, under great obligations to the Inspector-General of the Royal Irish Constabulary and to the officers and members of the Force, and also to the officers and men of the Coast Guard Service, for very valuable assistance given in connection with fishery and other operations. Co-operation
of Royal
Irish Con-
stabulary,
&c.

The accounts of receipts and payments in the year ending 31st March last, as furnished to the Comptroller and Auditor-General, with full details under each head, and statements of the loans issued, are submitted in the Appendix of this Report. Accounts.

APPENDIX XXV.

INSURANCE OF LIVE STOCK PUT TO GRAZE ON THE BOARD'S FARMS.

System proposed by Mr. HENRY DORAN, Chief Land Inspector, and adopted by the Board for the year 1906.

The owners of the grazing cattle placed on the Board's farms will be charged a grazing rent, according to the age and size of the animals, varying from £1 to £2 10s. for the summer half-year, and the rate of insurance paid will be 1s. in the £1 on the grazing rent. The amount to be paid to the owner in the case of accident or death will be two-thirds of the declared value at the time the animal is put to graze on the farm. Out of the grazing revenue of each farm 6d. in the £1 will be paid into the general insurance funds to meet losses, and any surplus at the end of the half-year from both sources of premiums, that is, the owners' payments and the contribution from the Board's grazing receipts will be retained as a reserve.

The following table shows the rates of insurance and the premiums in accordance with above, and these are to be collected on the day the cattle are placed on the land.

Grazing Rent.	Value of Animal at time of Insurance.	Two-thirds of value to be paid in event of death before 1st November, 1906.	Insurance Premium paid by Owner for 6 months.	Insurance Premium paid by Farm.
	£ s. d.	£ s. d.	s. d.	s. d.
25s.	5 0 0	3 0 0	1 0	0 6
25s.	6 10 0	4 0 0	1 3	0 8
30s.	6 0 0	5 0 0	1 6	0 9
40s.	10 0 0	6 13 4	2 0	1 0

A simple form of policy has been prepared, declaring that on payment of this premium the owner of an animal, stated to be worth, say £6, will, in the event of death from accident or disease, be paid £4.

The average rent per head received for grazing stock is about 25s.

This would, on above table, show the average value of the beast to be £6 10s. The average sum to be paid in case of death would be £4 6s. 8d., and the average premium, 1s. 3d. from the owner, and 8d. from the revenue of the Farm. At 25s. per head the grazing rent of 80 beasts would amount to £100.

It is estimated that deaths will not exceed one and a half per cent. for the six months. This would represent payments per 100 beasts of £6 10s. 0d., or £5 4s. 0d. for 80 beasts. The premium paid for 80 beasts by owners would be 1s. 3d. per head = £5, and the premium paid from the Farm revenue would be £2 10s. 0d.; total £7 10s. 0d.

Under the Land Act, 1900, the advances made by the Local Government for the purchase of estates by the Board do not pass through the Board's hands, being made direct by the Local Government.

The expenditure on various items is brought up to 31st March, 1900, but in most cases the works have not been completed. Expenditure on administration is not included.

Fig. shows cases for which provision has been made, but which have not yet been made.

Wrightman and Wicks (Dr. Bishop) have advanced £10,000 each, and will be repaid as soon as possible.

Wicks (Dr. Bishop) and Wicks (Dr. Bishop) have advanced £10,000 each, and will be repaid as soon as possible.

No. 19612.

DUBLIN CASTLE,

4th September, 1906

SIR,

I have to acknowledge the receipt of your letter of the 3rd instant, forwarding, for submission to His Excellency the Lord Lieutenant, the Report of the Congested Districts Board for Ireland for the year ended the 31st March, 1906.

I am,

Sir,

Your obedient Servant,

(Signed) J. B. DOUGHERTY.

The Secretary,

Congested Districts Board,

Dublin.
